

Editorial

The demand for HMAPs is growing worldwide. Their roles in the research of new products used in several domains as the perfume shop, the cosmetic, the pharmacy, agricultural, the food, the nutraceuticals, the health of the local populations and of other industries is not anymore to demonstrate.

In recent years, the importance of herbal, medicinal and aromatic plants (HMAPs) as a vehicle for traditional medicine, rural development and livelihood improvement for the poor communities has been increasingly recognized. Moreover, HMAPs have the potential to contribute to medicinal, local economies, subsistence health needs, and improved natural resources management, leading to the conservation of biodiversity.

The Focus of the International Arabian Journal of Medicinal and Aromatic Plants (AMAP) are to publish excellent and unprecedented researches, to disseminate the articles freely for research, to provide a platform in all areas of Medicinal and aromatic Plants fields.

The establishment of this Journal, AMPA is an answer to the wishes and desires of many researchers and teachers in developing nations especially in Arab, Africa and Asia who lack free access to quality materials online.

It's an open Access Journal to the full text of articles serving the best interests to the scientific and economic communities. The research journal promotes the exchange of knowledge and research in the different areas: basic research on Medicinal and Aromatic Plants (MAP's), Perfumery, Culinary herbs, Aromatic plants, Ethnopharmacology, Phytotherapy, Phytomedicines, Agronomy, and Breeding & Genetics, Botany (General & Systematic), Phytochemistry, Chemotaxonomy, Analytical & Processing Techniques, Biological Activity, Physiology & Biochemistry, Pharmacognosy, Pharmacology & Toxicology, Conservation of Medicinal and Herbal Plants, Crops Marketing & Trade.

On the behalf of AMAP's team, I would like extend our regard to all the Editorial Board and fellow researchers and scholars and wish prosperity in their field.
